

Pitch Deck Review

Startups use an Investor “Pitch Deck” which is generally a presentation consisting of PowerPoint slides at investor pitch sessions. First time founders often lack the knowledge and experience to generate contents in their Pitch Decks that are attractive to professional investors.

Many of the mentors in our platform have extensive knowledge and experience creating pitch decks both for their own startups and from their experiences as judges at investor pitch events. Having one of our mentors review your pitch deck and receive a written report on edits to make your pitch deck more effective to professional investors can be extremely helpful both for attracting investors and for building a good business model.

As a “**Paid Member of Startup-Mentors**” you are entitled to have your Pitch Deck reviewed by one of our mentors and receive a written report with detail edits on improvements to attract professional investors.

Please send your Pitch Deck to: pitch_deck@startup-mentors.com and pay \$100 using PayPal to Startup-Mentors. One of our senior mentors will review your pitch deck and send you a written report on improvements.
